CREATOR WORKFLOW

10-second structure

0–2 seconds: show the product or outfit. 2–7 seconds: reveal one or two details with close-ups or a clean transition. 7–10 seconds: finish with a strong hero shot and space for a call-to-action.

Product consistency

Use one reference image where possible. Ask the generator to preserve the exact bottle, label, garment colour, stitching, jewellery shape or packaging. Avoid asking it to invent label text.

Premium visual style

Use one lighting direction, a limited colour palette, uncluttered backgrounds and deliberate camera movement. Macro shots suit texture; full-body shots suit outfits.

Publishing checklist

Check product label, colours, proportions, spelling, claims, music rights and final crop before posting.

Final review: check spelling, visual consistency, faces, hands, logos, music rights and all product claims. AI outputs can contain errors; review before publishing.
