GLAMVERSE AI

ULTIMATE AI REEL BUNDLE

30 Short-Video Prompts + Creator Workflow

A broad creator toolkit covering cartoon stories, products, food, travel, education, lifestyle, small businesses and cinematic short-form content.

Format: 10-second scenes • 9:16 vertical • Reels / Shorts ready

How to use

1. Copy a prompt into your AI video generator.
2. Replace generic details with your own product, character or reference image.
3. Reuse the same reference and description to keep visuals consistent.
4. Review the result, add captions and music in your editor, then export.
5. Check facts, product claims and usage rights before publishing.

Optional negative prompt: blurry, flicker, warped hands, extra fingers, distorted face, inconsistent character, changing product shape, unreadable text, random logos, watermark, abrupt camera shake.

PROMPT LIBRARY

3D cartoon intro

10-second vertical 3D cartoon intro. An original friendly character steps into frame, waves and smiles. Bright cinematic lighting, expressive face and consistent design.

Mini adventure cliffhanger

10-second animated short: a small hero discovers a glowing mysterious box, reaches toward it and a bright light fills the frame before the reveal. End on suspense.

Funny talking object

10-second comedy scene where an everyday object comes alive and reacts dramatically. Clear facial expressions, readable body language and one visual punchline.

Food transformation

10-second food reel showing fresh ingredients assembling into a plated dish through smooth match cuts. Macro texture, appetising steam and clean kitchen lighting.

Travel reveal

10-second travel reel: close-up of suitcase or map, transition to a cinematic scenic destination, then one memorable detail. Natural colours and smooth camera move.

Motivational sunrise

10-second cinematic scene of a person opening curtains as sunrise fills a quiet room. Slow push-in, warm light and clear space for captions.

Tech gadget hero

10-second product reel for a supplied gadget. Slow orbit, close-ups of buttons and material, clean hero frame. Preserve exact design; do not invent specs.

Educational explainer

10-second visual explainer for one simple supplied concept. Three clear visual stages, uncluttered composition and space for accurate captions added later.

Pet personality

10-second wholesome pet video. A friendly pet notices a harmless surprise, tilts its head and reacts playfully. Natural movement and realistic anatomy.

Mystery doorway

10-second suspense scene: a character approaches a glowing doorway, pauses and opens it slightly to reveal unexpected light. End before the reveal.

Room makeover

10-second room makeover reel. Start with a simple empty room, use a camera-swipe transition, then reveal a tidy furnished space. Keep layout and angle consistent.

Miniature world

10-second macro scene of a tiny imaginative world built around an everyday object. Detailed miniature textures, shallow depth of field and magical lighting.

Sports energy

10-second sports-inspired scene showing an athlete preparing, making one dynamic move and celebrating. Safe, plausible movement and dramatic tracking.

Festival greeting

10-second festive animation with warm lights, tasteful decorations and an original cheerful character. Leave clear space for the creator's greeting text.

Craft process

10-second craft reel showing raw materials becoming a finished handmade item through three stages. Close-up hands, realistic materials and clean tabletop.

Book to fantasy

10-second fantasy scene: a book opens on a desk and a miniature colourful world appears from its pages. Detailed paper textures and magical light.

Cafe ambience

10-second cafe reel: coffee being poured, pastry placed beside it and warm table shot. Natural steam, inviting light and realistic liquid motion.

Fashion walk

10-second fashion walk with one model in a supplied outfit. Smooth tracking, natural gait, accurate fabric movement and consistent clothing.

Satisfying clean-up

10-second transformation: cluttered surface, quick tidying actions and a clean final reveal. Fixed camera and realistic objects.

Nature micro-doc

10-second nature scene focused on one animal or plant in its environment. Gentle macro or telephoto movement and realistic details.

Mascot reaction

10-second 3D animation of an original cute mascot reacting to a surprising sound. Clear expression, simple staging and consistent proportions.

Product unboxing

10-second unboxing for a supplied product: sealed package, opening, reveal and final close-up. Preserve packaging and product identity.

Science visual

10-second educational visual of one simple science phenomenon. Clear cause-and-effect sequence and realistic motion; add exact labels later.

Rainy window

10-second atmospheric scene of raindrops on a window while warm indoor light glows behind it. Slow focus shift and cinematic reflections.

Street food

10-second street-food reel: ingredients sizzling, quick plating shot and final appetising hero frame. Realistic steam and food textures.

Creator desk

10-second desk setup reel revealing camera, microphone, laptop and soft ambient lighting through a smooth side pan. No invented logos.

Magical object

10-second animation where an everyday object briefly floats and glows, then gently returns to the table. Consistent shape and believable motion.

Small business promo

10-second promo for a supplied small-business product or service. Show the real product, one useful detail and final hero frame. No invented prices or reviews.

Three-scene story

10-second micro-story: character notices a problem, tries one solution and gets a funny or heartwarming result. One location, consistent character.

Seamless loop

10-second vertical video ending in a frame visually matching its opening. One repeated action, steady camera and consistent lighting.

CREATOR WORKFLOW

Hook in the first second

Start with a reveal, unexpected expression, close-up detail, transformation or question added later as text. Make the first frame understandable without sound.

Simple story formula

Character or subject → small problem or curiosity → one action → payoff or cliffhanger. Keep a 10-second story to one location and one main action.

Visual consistency

Create a character or product reference first. Reuse the same reference image, description, clothing, palette and camera style across scenes.

Editing workflow

Choose a 9:16 canvas, trim dead time, add readable captions, balance audio, keep transitions purposeful and export at the best resolution your generator supports.

Content rhythm

Rotate stories, product showcases, tutorials, behind-the-scenes clips, transformations and audience questions. Review watch time and saves to learn what works.

Rights and accuracy

Check facts, names, spelling, faces, logos, music rights and platform rules. Do not imply results, testimonials or endorsements that cannot be substantiated.

Final review: check spelling, visual consistency, faces, hands, logos, music rights and all product claims. AI outputs can contain errors; review before publishing.
